

NOTICE OF STUDY COMMENCEMENT AND INFORMATION SESSION

THE MUNICIPALITIES OF MANITOUWADGE, MARATHON, SCHREIBER, TERRACE BAY AND WAWA PROPOSED NORTH SHORE PROJECT

The Municipalities of Manitouwadge, Marathon, Schreiber, Terrace Bay and Wawa (the Municipalities) are proposing to construct gas storage facilities (above ground storage tanks and associated vaporization systems) as well as local gas distribution systems (gas mains and service pipes) in each of the five municipalities of the North Shore. The North Shore LNG Project ("the Project") will include the construction distribution networks (made up of small mains/laterals ranging in Nominal Pipe Size (NPS) 2" to 6" in size, depending on specified loads. The distribution networks will be primarily designed to be located within existing municipal infrastructure (road easements, etc.).

Public consultation with landowners, Indigenous communities, government agencies and other interested persons is an integral component of the planning process. An Information Session regarding the proposed Project will be held in each of the five Municipalities as follows:

Tuesday, April 9, 2019
12:00 p.m. to 3:00 p.m.
Michipicoten Memorial
Community Centre
3 Chris Simon Drive
Wawa, ON

Wednesday, April 10, 2019
12:00 p.m. to 3:00 p.m.
Manitouwadge Community
Centre
23 Manitou Road
Manitouwadge, ON

Thursday, April 11, 2019
12:00 p.m. to 3:00 p.m.
Schreiber Community Hall
100 Langworthy Street
Schreiber, ON

Wednesday, April 10, 2019
5:00 p.m. to 8:00 p.m.
Marathon Centre Mall
2 Hemlo Drive
Marathon, ON

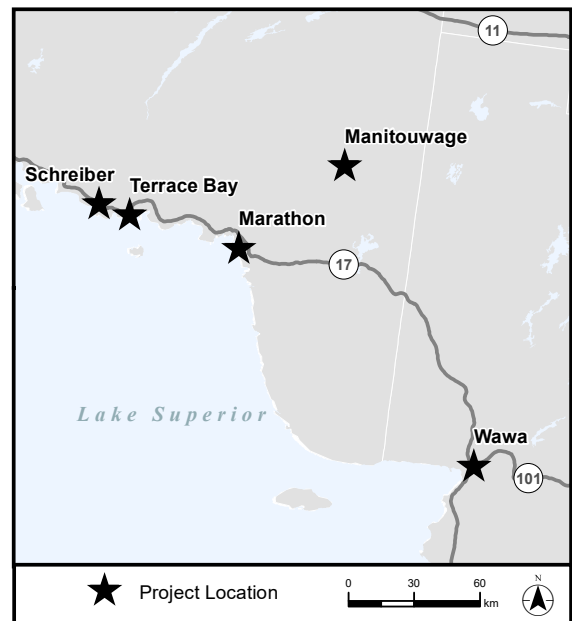

Thursday, April 11, 2019
5:00 p.m. to 8:00 p.m.
Michael King Hall
13 Selkirk Avenue
Terrace Bay, ON

The Information Sessions will be conducted as drop-in style, and representatives will be available to discuss the proposed Project including the proposed routes, design and the anticipated Project schedule. Input received will be used to inform the planning around the preferred pipeline route, and to develop site specific environmental protection or mitigation measures for the Project.

As part of the planning process, the Municipalities have retained Stantec Consulting Ltd. to undertake an Environmental Study of the construction and operation of the proposed natural gas pipeline. The Environmental Study will fulfill the requirements of the Ontario Energy Board's (OEB's) Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Pipelines and Facilities in Ontario, 7th Edition (2016).

It is anticipated that the Environmental Reports for the studies should be completed by June 2019, after which the Municipalities will file applications for the proposed pipelines to the OEB. The OEB's review and approval is required before construction of the Project can proceed. If approved, construction of the pipelines and storage facilities is anticipated to begin in Spring 2020.

For any questions or comments regarding the Environmental Study or the proposed Project, please do not hesitate to
